

## PDF-to-Image

Convert PDF documents into images with single, batch or random pages processing.

### Options

Effortlessly convert PDF onto images with a single execution of,

1. Convert Single File.exe
2. Convert Batch File.exe
3. Convert Random Pages.exe

### Download

[Windows 10](#)

### Organised

Every single execution format has its own output directory inside, where the script stores the output images. Also a Progress bar indicates the progress of the conversion.

### Usage

[\_Note for contributors: Here the instructions are for [downloadable](#) .exe files. But the instructions are same while using .bat or .exe files\_]

1. Convert Single File.exe Simple & straight-forward, run and pick a file.
2. Convert Batch File.exe Place all the PDF documents in the `workspace/source/batch` directory, Run the exe file.
3. Convert Random Pages.exe Place all the PDF documents in the `workspace/source/random` directory, Run the exe file. Random pages within the documents will be saved.

### REQUIREMENTS [For contributors]

[PyPDF2](#)

```
pip install PyPDF2
```

[pdf2image](#)

```
pip install pdf2image
```

[tqdm](#)

```
pip install tqdm
```
